Con Edison Smart Meters Coming to Scarsdale!

Con Edison has begun upgrading residential electric and gas meters with “[Smart Meter Technology](#).” Meter installations will take place Monday through Friday from 7 a.m. – 8 p.m. by uniformed installers from Smart Grid Solutions, a ConEd contractor. All Smart Grid Contractors will drive “Smart Meters Coming Your Way” [branded vehicles](#) and are required to present their ConEd-issued identification card on request. If you'd like to schedule an appointment or verify a contractor's credentials, call Smart Grid Solutions at 1-800-686-4207. Additionally, residents should receive advance notification of the installation and [basic information on the smart meter technology](#) by way of a post card mailed from ConEd roughly three months ahead of the planned meter installation, followed by a reminder letter mailed approximately 45 days ahead of time.

If your current meter is located inside your home, information will be provided in the letter on how to make an appointment to provide access to the meter. Please note that installation of the smart meter will result in a brief disruption of electrical service. **If you operate life-support equipment at your home, it is important that you call Con Edison at-1-800-752-6633 regarding Smart Meter installation at your home.**

When combined with home energy management devices and systems, Smart meters will enable Con Edison customers to access and use [detailed consumption data](#), which will empower them to pursue energy conservation and efficiency goals while saving money. Smart Meters will also allow Con Edison to remotely read meters, thereby eliminating estimated billing or the need to enter a home to conduct a meter read. Smart Meter deployment will also enable remote detection of power outages, more accurate reporting of outages, and assist ConEd in managing their related restoration activities.

More information on smart meters can be found in the Smart Meter [FAQ](#).
