

RECYCLE YOUR TENNIS BALLS!

A new company, reBounces has created a program to recycle tennis balls, getting the dud balls off the court and back into action.

Green is good, recycling is good, and reBounce was conceived with this in mind. Their recycling program allows anyone to send a box of at least **200 decent quality balls back to reBounce.**

Please recycle your balls and team up with the

Scarsdale Parks, Recreation & Conservation to
Replay, Reuse, & Recycle your tennis balls!!!

You may drop off your used tennis balls to any of our 3 drop box tennis court locations.

(Crossway, High School, or Brite Avenue)

Not all tennis balls but most will resale to dog trainers, schools, hospitals, and churches to put on bottom of chairs to protect the floors. They also will grind them with other products to make mats of different thickness.

The Company discourages sending them balls in which the felt has been removed, torn, or full of mud since they will not be able to repurpose!
