### ConEd Gas Infrastructure Safety Inspections

If ConEd has not yet been granted access to the interior of your property to perform a [gas infrastructure safety inspection](#) at your residential and/or commercial Scarsdale property, please be sure to minimize the inconvenience of that mandatory inspection by scheduling an appointment today. Appointments are available by calling ConEd at 1-800-643-1289. While the inspection, performed by ConEd subcontractors, should take roughly 15 minutes to complete, some appointments could be longer if a minor leak is identified and requires dispatch of ConEd for the repair; please plan your schedule accordingly.

Importantly, property owners may be levied a fine and/or have the gas supply shutoff if access for the mandatory inspection is not granted within 60 days of the letter ConEd previously mailed to each property owner that has yet to authorize the necessary access.

As added background, the entity that regulates utilities in New York, the NYS Department of Public Service (DPS), mailed an [Important Safety Message](#) letter in December 2020 detailing the necessity for property owners to provide access to their property in order to facilitate the mandated gas infrastructure inspection. Any questions about the DPS letter may be directed to 800-342-3377, 8:30 AM to 4:00 PM, Monday through Friday. DPS is also the entity that receives and processes formal utility [complaints](#), which they accept [online](#) or by phone using the number above.

While ConEd and their subcontractors are operating under a NYS mandate to complete the safety inspections without further delay, it should be noted that subcontractors working for ConEd are required to exhibit professionalism in endeavoring to secure the necessary access and complete all needed work. To that end, ConEd has recently engaged leadership from each of their field subcontractors to reinforce their service standards for all such customer field interactions.

ConEd subcontractors arriving to complete the inspection will present appropriate identification and will be adhering to COVID-19 safety protocols.
