Face Coverings Required at Village Facilities (Updated)

Effective today, *all* persons visiting indoor Village facilities are required to wear a face covering and should endeavor to maintain social distancing. We are not presently screening persons entering our facilities for COVID-19 symptoms, but persons with symptoms, regardless of vaccination status, should consult with a physician and avoid visiting all Village facilities.

This measure is being implemented as a precaution in response to the recent [Interim Public Health Recommendations for Fully Vaccinated People](#) published by the Centers for Disease Control.

The CDC has focused its new guidance on areas of [substantial or high transmission](#). With Westchester County having now been designated as an area of substantial transmission, this action is timely and necessary to help reduce the likelihood of disease transmission.

We are continuing to monitor both CDC and New York State Department of Health guidance for any additional measures that may become necessary as we head into late summer and fall.

Thank you for your cooperation in wearing a face covering while visiting indoor Village facilities.
