Air Quality Update: PRC Closures and Cancellations

Due to continuing unhealthy air quality, the Scarsdale Pool Complex will be closed today.

The following Parks, Recreation, and Conservation activities are also canceled today in response to air quality impacts associated with the forest fires in Canada:

- Tennis Lessons
- Nature Preschool at Weinberg Nature Center
- PRC Adult and Youth Softball
- All pool programs

While our parks and fields remain open to public use at this time, all users and other visitors are strongly encouraged to use their best judgement and to adhere to USEPA recommendations for activity restrictions in connection with the current published [Air Quality Index](#) (AQI), which is updated hourly.

As of this writing, the Scarsdale AQI is 215, or “Very Unhealthy.” The USEPA recommends:

People with heart or lung disease, older adults, children and teens:

- Avoid physical activities outdoors.

Everyone else:

- Avoid strenuous outdoor activities.
- Keep outdoor activities short.
- Consider moving physical activities indoors or rescheduling them.

Please direct any questions regarding Parks, Recreation and Conservation programs or facilities to the PRC Department at 914.722.1160, or by email using recreation@scarsdale.com.
