Air Quality Update: Return to Normal Operation

In response to an improved Air Quality Index, having dropped to the current [AQI](#) of 55, the Scarsdale Pool Complex is open today and no potential future closures are forecasted at this time.

All outdoor Parks, Recreation, and Conservation programs and activities have returned to normal scheduling, unless registered participants are otherwise notified directly.
All parks and fields continue to be open to public use.

To reiterate, as of this writing the Scarsdale AQI is presently 55, representing a substantial improvement over the past couple of days. Based on the observed AQI, the USEPA recommends the following for persons “**unusually sensitive**” to particle pollution:

“If you are unusually sensitive to particle pollution, consider reducing your activity level or shorten the amount of time you are active outdoors.” They encourage everyone else to “enjoy your outdoor activities.”

Because the AQI is update hourly, interested residents are encouraged to check the current measures online at the USEPA’s webpage, airnow.gov.

Please direct any questions regarding Parks, Recreation and Conservation programs or facilities to the PRC Department at 914.722.1160, or by email using recreation@scarsdale.com.
