Green Light for Installation of Traffic Light at Post and Edgewood

The Village of Scarsdale is excited to share that New York State Assembly Member Amy Paulin and New York State Senator Shelley Mayer have successfully collaborated with the New York State Department of Transportation (DOT) for the installation of a traffic light at the crosswalk connecting Edgewood Road and Post Road.

Several years ago, the Village expressed safety concerns about this intersection to the DOT, which led to the installation of a crosswalk warning sign with flashing yellow lights. However, pedestrian safety issues continued, leading to Assembly Member Paulin and State Senator Mayer negotiating with the DOT for installation of a traffic light. Paulin and Mayer also secured \$1 million in funding needed for the project to move forward.

Installation of the traffic light was initially scheduled to take place in 2026, but was advanced to 2025 at the urging of our state representatives, who continue to work with the DOT to expedite the installation timeline. For more information on this critical traffic safety improvement, see the [press release](#) from the New York State Assembly.
