### **Post-Storm Damage Assessment Survey & Storm Resources**

New York State has developed an [online survey](#) allowing residents to self-report damages to their homes and/or businesses from the most recent rainfall flooding event on September 29. The purpose of this form is solely to collect information that may help State and local officials identify damages and develop requests by the State for federal disaster recovery assistance programs. Please note that this form is not an application for disaster relief programs and does not guarantee disaster relief assistance.

The Village also wants to share our new [Storm Preparedness webpage](#). We want residents to be ready in the event of another storm, or other inclement weather, which is why we've gathered critical resources to help you be prepared before, during and after a storm event.

Lastly, we strongly encourage all residents to register to receive emergency communications from the Village through Everbridge, a comprehensive, state-of-the-art communication system designed to provide you with important information as swiftly as possible, especially during a crisis. You can enroll now by visiting <https://tinyurl.com/VOSEmergencyAlerts>. There is also an app for iOS and Android, "Everbridge Public Safety", that can be downloaded on your mobile devices.

Being prepared and informed is our collective responsibility and a vital part of ensuring the well-being of our community.
